

Hog Hunt/Hog Control Adventure: Robert Waddell is offering three nights of hog control instructions in Mississippi. This includes trapping using satellite trap checkers and wireless trail cameras, shooting at night with night vision, thermal imagery scopes and electronic monitoring, and locating of hogs with satellite telemetry units.

These instructions are being offered during March of 2018 while Robert is defending the seed corn from the hogs when the corn is planted. Robert killed 401 hogs during March of 2017.

The purchaser is encouraged to bring a chest-type freezer and butcher as many hogs as they desire to take home. If the purchaser wishes to “shoot” hogs they will need to purchase an “All Game” permit. The first week of March is always a heavy kill week and would be an ideal to schedule this adventure. All lodging and meals are furnished with this hunt / instructions.

Valued at \$1,800, minimum bid that will be honored is \$1,000.

If anyone would like to talk to people who have previously purchased this donation, they are encouraged to contact John Boror (620) 332-7879 or Michael O’Brian (218)330-5632. Please contact Robert at (660) 216-1780 if you have any questions. Texting is welcome
